## Development of the Biodiversity Portal Site “IKIMONO-INFO”

Takahiro AOKI, Yutaka IKEDA

---

The biodiversity portal site “IKIMONO-INFO” has been developed on the Hazama-Ando Intranet. It consists of six categories: Hazama-Ando Biodiversity Guidelines, Model Construction Sites or Proposals for Biodiversity Conservation, a Previous Internal Case Study, Guidance of Activity for Biodiversity by Hyogo Prefecture, a Collection of Related Sites for Biodiversity and a Map of Potential Natural Vegetation. This Data Base (“IKIMONO-INFO”) enables our corporate members to access information on biodiversity in construction sites or make proposals to customers. The contents are described in this paper.
